## Android Software Developer (m/f)

---

Your primary focus will be development of Android applications and their integration with back-end services. A successful candidate will collaborate with other teams which are also creating similar feature sets in other mobile platforms. The process requires iterative development, the drive to learn new technologies and apply knowledge of emerging technologies into demonstrable prototypes. Your main responsibilities will be:- Translate designs and wireframes into high quality code- Development, delivery, and maintenance of mobile applications across multiple devices- Ensure the best possible performance, quality, and responsiveness of the application- Identify and correct bottlenecks and fix bugs- Help maintain code quality, organization and automation- Prototype creative solutions quickly, and be able to collaborate with others in crafting and implementing your technical vision- Improving code quality by staying on top of new technologies and development approaches- Ensure that Android apps are safe and secure, in compliance with corporate risk and security standards- Identify opportunities for process and tool improvements and drive those from concept to implementation
